

# THE ANDERSON Adjustable Ratchet Wrench

For Automobiles and Machinery of all kinds

"A MARVELOUS INVENTION"

## The Only Wrench of Its Kind

**I**T is especially adapted for *Automobile* work, *Garages*, *Machine Shops*, and every place where a wrench is required, in that it is of a *Universal* type and may be used at every *conceivable angle*, taking the place of three or four ordinary wrenches, since the *head is adjustable to any size nut* within the range of the tool and its construction is such as to reach the nut where no other wrench will.

The jaws are opened or closed by means of the worm in the center. The ratchet operates from either side.

The tool is especially convenient where space is limited.

Material used is high-grade carbon steel, drop forged and case hardened.

This wrench is manufactured in two sizes, 6 and 8 inch. The 6 inch will take from the smallest up to a half-inch nut, and the 8 inch up to a five-eighths inch nut.

The "*Anderson*" will be found especially advantageous in plants where machinery requires frequent adjustment and in the assembling of machinery in general.

*A necessary tool for the farm.*

It is no toy, but a *practical tool* that will save its price in time with a few hours use.

*Satisfaction guaranteed or money back.*
